Sustainability Policy

Can-One Berhad and its subsidiaries are dedicated to integrating sustainability into all aspects of its operations to address climate change, minimise environmental impact, promote social responsibility, embrace good corporate governance and ensure long-term economic viability. Our commitment to sustainability is guided by the following principles:

- **Greenhouse Gas Emissions**

We will strive to reduce our greenhouse gas emissions in line with the goal of achieving Net Zero by 2050. Implement energy-efficient technologies and practices to minimise our carbon footprint in manufacturing processes, transportation, and facilities.

- **Renewable Energy**

Increase the use of renewable energy sources to reduce our reliance on fossil fuels and lower our emissions.

- **Environmental Stewardship**

We will strive to minimise our carbon footprint, reduce waste generation, conserve natural resources, and protect biodiversity through sustainable practices.

- **Social Responsibility**

We will prioritise the health, safety, and well-being of our employees, customers, and communities by fostering a culture of inclusivity, diversity, and respect.

- **Economic Prosperity**

We will seek to create value for our stakeholders by pursuing sustainable growth and innovation that balances economic prosperity with environmental and social considerations.

- **Responsible Supply Chain**

We will work with our suppliers to promote ethical sourcing, fair labour practices, and environmental responsibility throughout our supply chain.

- **Stakeholder Engagement**

We will engage with our employees, customers, suppliers, and the community to foster transparency, accountability, and a culture of sustainable practices.

By adhering to this sustainability policy, we are committed to being a responsible corporate citizen, playing our role in combating climate change, and contributing to a more sustainable future for our planet.
